

## ■ Description

The MB852LXXB series is a high voltage, ultralow-power, low dropout voltage regulator. The device can deliver 100mA output current with a dropout voltage of 500mV and allows an input voltage as high as 24V. The typical quiescent current is only 1.7 $\mu$ A. The device is available in fixed output voltages of 3.0, 3.3 and 5.0V.

The device features integrated short-circuit and thermal shutdown protection.

Although designed primarily as fixed voltage regulators, the device can be used with external components to obtain variable voltages.
